

2017 CONFERENCE

Harmonious Development

**Dr Annette M Haines
& Alex Shepherd**

Dr Annette M Haines is an internationally recognised lecturer, examiner, school consultant and trainer of the Association Montessori Internationale (AMI). She has an extensive background in Children's Houses and holds both AMI Primary and Elementary Diplomas.

Harmonious Development of the Child - Montessori made discoveries based on her observations in Children's Houses that were ground-breaking in her time. Dr. Haines will discuss some of the latest research on movement, cognition, and attention which demonstrates that Montessori is not only still relevant today but that, perhaps, modern science is just starting to catch up. Dr. Haines' talk will focus on why movement is so connected with learning, and the development of executive functions.

Alex Shepherd holds a Montessori Diploma and owns three Outstanding Montessori Children's Houses with his wife, Helen. He is the co-founder of Kids Love Nature and has over 15 years' experience delivering high quality early years practice to children and families. He leads training courses for early years practitioners, teachers, parents, and university students.

Harmonious Development of the Adult - Harmony in the child is nurtured by a harmonious team. In the afternoon Alex will look at the perspective Montessori can give us to enable successful and harmonious teamwork.
